iText in your document workflow
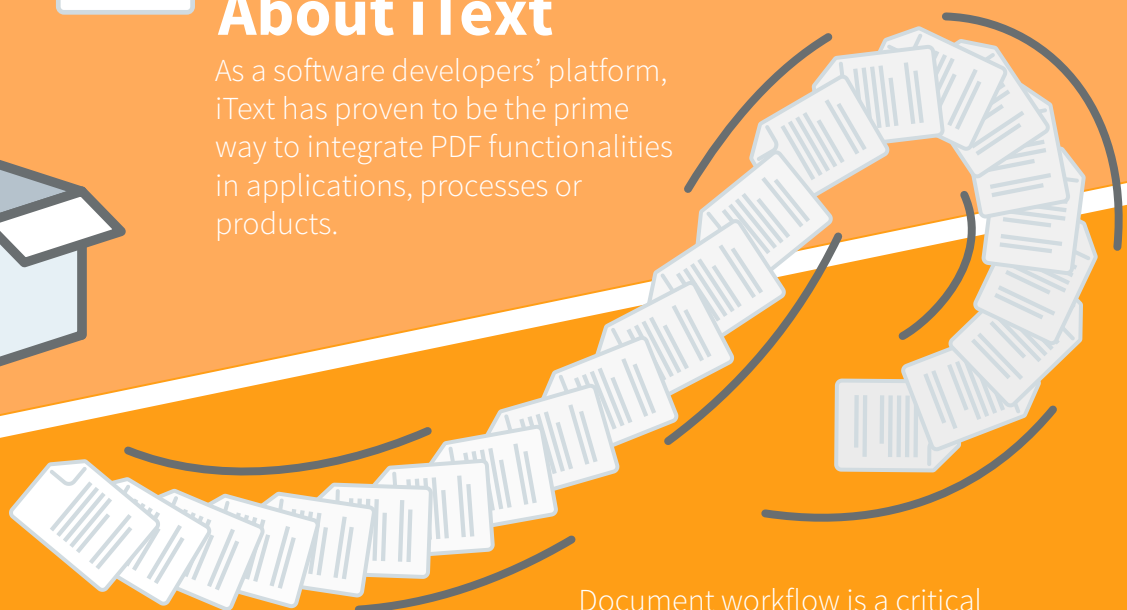

Prevalence of the PDF Format

PDF is one of the world's most widely used document formats.

PDF

About iText

As a software developers' platform, iText has proven to be the prime way to integrate PDF functionalities in applications, processes or products.

Document Workflow

Document workflow is a critical process in companies.
Data is key to a company's success.

iText Core Library

pdf2Data

For information acquisition, iText assists you in handling PDF documents, by processing dynamic forms with pdfXFA or iText Core and extracting data from PDF documents with pdf2Data.

PDF Generation

Program Your Document

One of the options for generating your document is to program it. This approach offers you full control in creating smart, structured PDFs.

HTML Conversion

The pdfHTML iText add-on can help you turn HTML documents into PDF documents.

Templating

To create custom PDFs such as tickets, you can add formfields to your document, and use iText to fill in the fields, generating your custom PDFs.

Redaction

You can remove sensitive data from your documents with pdfSweep.
