iTEXT® DITO

What is iText DITO?

iText DITO is an easy-to-use collaboration solution to create, edit, and manage data-driven templates for customer communication document generation.

Auto scale horizontally and vertically to fulfill your volume needs. iText DITO is so flexible it can fit into new complex workflows or legacy enterprise solutions.

- ✓ **Produce large quantities of PDFs very quickly.**
- ✓ **Effortlessly comply with accessibility regulations (PDF/UA, Section 508).**
- ✓ **Unburden your developers and empower your non-tech users with a built-in assets manager and a template editor.**
- ✓ **Enable multiple teams to work in different workspaces.**

> **Smart tip:** Did you know iText DITO is built on the award winning iText 7 PDF SDK? All of the power of iText 7 Core – no coding skills required.

How does iText DITO work?

With iText DITO, you can match your current solution look and feel with our white labeling features and multi-tenant approach.

DESIGN

iText DITO's browser-based solution offers a user-friendly environment for crafting and managing data-driven templates and resources. Easily link up data in your designs with data bindings and document previews.
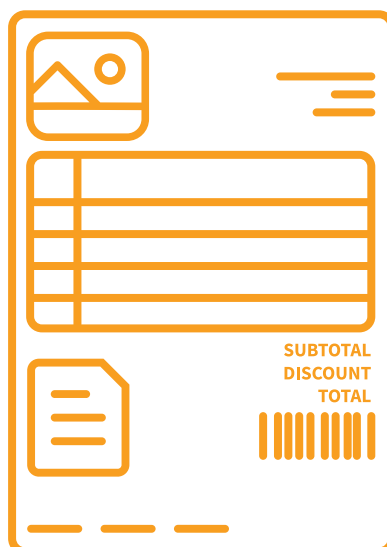

INTEGRATION

The powerful iText 7 powered PDF engine speaks your platform's language. Hook it up in no time using the Java SDK, or by deploying Docker containers, to start cranking out smart documents.

Dynamically insert **images** from input data or resources

Auto expand tables and lists based on arrays in the data collection

Apply **conditional logic** to insert and format content

SUBTOTAL
DISCOUNT
TOTAL

Format data as text, number, currency, percentage or date/time

Calculate subtotals, discounts, tax amounts and more without changing the data at source

Generate **barcodes** from numeric data or URLs

ITEXT® DITO 99

Features

Enterprise Grade

iText DITO is scalable, robust, capable of mass volume and ideal for large enterprise usage.

Universal Accessibility

By building on top of our flagship PDF library, iText DITO is able to produce PDF/UA compliant documents out-of-the-box. Comply with the ADA Act, Section 508 or the WCAG without even trying.

Visual Template Designer

iText DITO uses an interface to build templates via drag and drop, replacing cumbersome coding.

Fast and Convenient

iText DITO reduces the time to develop templates. It makes both maintenance and updating of templates easier and faster.

iText DITO API

The iText DITO API gives developers the flexibility to integrate its functionality into existing processes and can be customized to meet your document workflow requirements. It is available as either a Java SDK or a Docker image with a straightforward and programming language agnostic RESTful API for convenient deployment and scaling.

We're also developers!

In our over 20 years of code, we know how important it is to have good documentation, and good processes in place. You can always find comprehensive documentation and code examples online. Commercial customers can also count on our world-class in-house customer support, offering direct access to expert assistance from our development team.
